

Latex Certificate Course Instructions

Jacob Antony

February 17, 2021

1 Exercises

1. Change every subsubsection* into subsubsection and compile twice
Note that the table of contents is updated on second compilation.
2. Format every occurrence of ‘abelian’ using `\textit{...}`
3. Format every occurrence of ‘acyclic’ using `\textbf{...}`
4. Insert a line break in §1.1 ‘Enumerating distinct groups’ before ‘Suppose m is a factor ...’

2 Commands

`\title` Command to input document title for `\maketitle` command.

`\author` Command to input document author for `\maketitle` command.

`\date` Command to input document date for `\maketitle` command.

`\today` Command to print current date.

`\maketitle` Command to generate ‘Title’ page using title, author, and date informations.

`\tableofcontents` Command to generate ‘Table of Contents’ page with page numbers. All unstarred-headings are automatically considered for ‘Table of Contents’ page. On first compilation after a change, the associated ‘toc’ file is updated. And on second compilation after the change, the ‘Table of Contents’ page is updated to reflect the change according to ‘toc’ file.

`\textit` Command to format text into italics font style.

`\textbf` Command to format text into boldface font style.

`\\` Command to insert a line break after some text.
